

# BLAINE L. MERCADO

## FULL STACK WEB DEVELOPER & IOS ENGINEER

[www.blainemercado.com](http://www.blainemercado.com)

### PORTFOLIO

**RaiseAttention** - [www.raiseattention.com](http://www.raiseattention.com)

Python | Django | SQLite3 | Nginx | gUnicorn | AWS

RaiseAttention is a site designed to generate awareness for a cause and through people's attention raise add dollars to fund donations for good causes · The more traffic to the site, the more ad revenue, and the more money raised to donate · If we can RaiseAttention, we can raise money

**Ditty** - <https://vimeo.com/188237697>

JavaScript | Angular | Node.js | MongoDB | Mongoose

A one-stop shop for all your favorite Music Festivals where you can learn about the artists, sample their music, and build a personal calendar for all the shows you want to see · Login and registration is encrypted using bcrypt with the option of using Facebook login

**Groups** - <https://vimeo.com/190775787>

Python | Django | SQLite3 | jQuery | Bootstrap

A social network site designed to encourage inclusive communities · Users can post messages on other user's profiles and comment on posted messages · Login and registration is encrypted using bcrypt

**Clust 'r Bust** - <https://vimeo.com/190788268>

Swift | SpriteKit | Socket.io | Node.js

A multi-player iPhone app under development · The goal is to score points by matching colored disks · You can earn a power-up which allows you to fling disks off your screen which is worth extra points

**Hint.e** - <https://vimeo.com/190767922>

Swift | CoreData | AVPlayer | API

A social iPhone game like Taboo · Randomly generated movie titles will show on the screen and one player needs to get a teammate to guess the movie title without using any of the words in the title · AVPlayer provides in-game music and sound effects · Built entirely in a single-day hackathon
